Empowering AI with Search:
Unlocking Insights at Scale
11/13/2024

AGENDA

- Why Solution Accelerators?
- Solution Overview
- Live Deployment Demo
- Tool-use Demo
- See if live-deployment worked

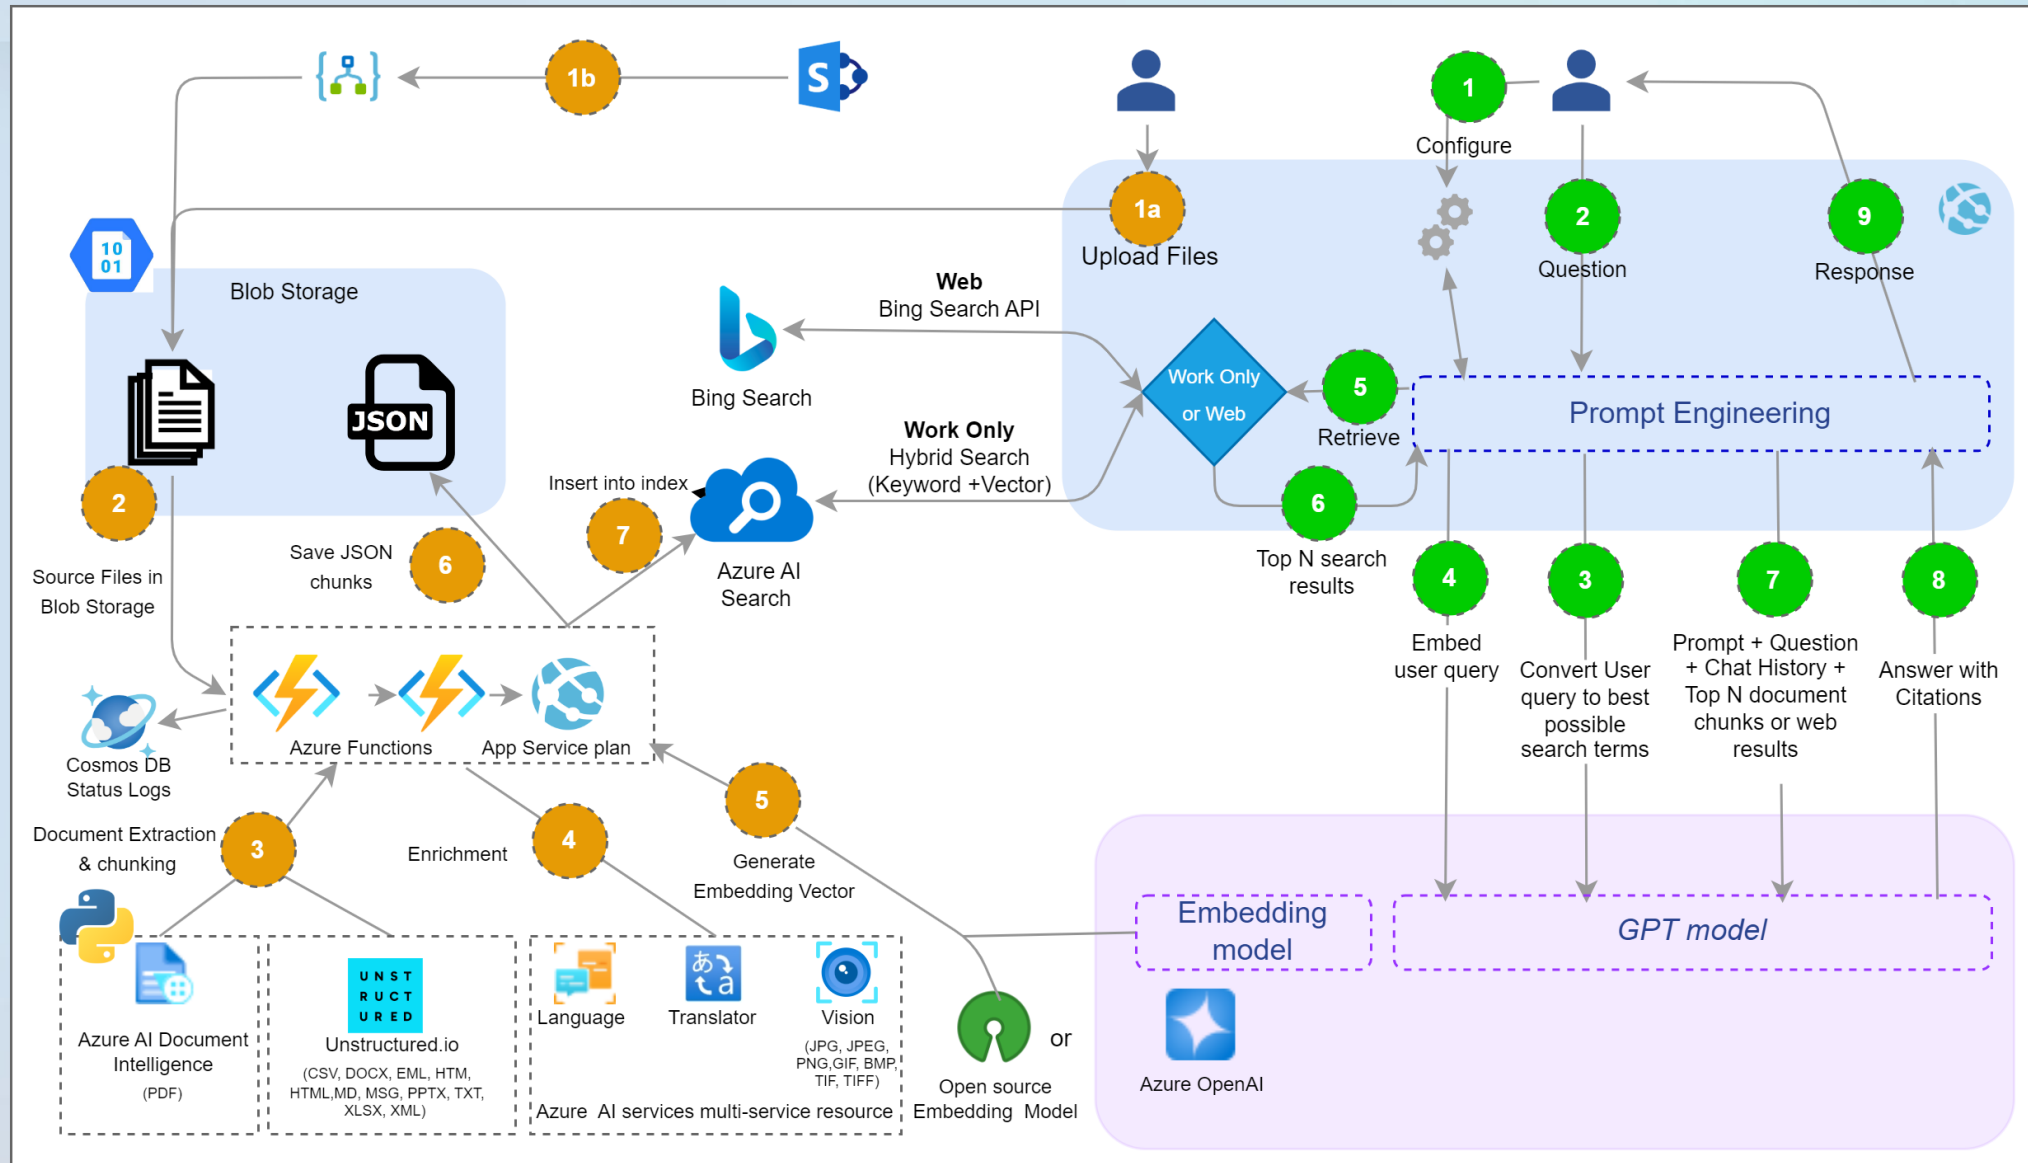

Why Solution Accelerators?

Pre-packaged, ready to deploy code.

Medium/low lift to get a Minimum Viable Product

Leveraging a Microsoft-piloted solution gives you the leverage the power of new-cutting edge technologies, with initial development costs pushed onto Microsoft.

Pub Sec Information Assistant Architecture Overview

Deployment Demo

[GitHub - microsoft/PubSec-Info-Assistant: Information Assistant, built with Azure OpenAI Service, Industry Accelerator](#)

Common Pitfalls in Deployment:

Insufficient Permissions: You need Owner / RBAC control at the subscription level

Providers not registered: The services that we are leveraging need to be registered at the subscription level.

Insufficient Quota/Capacity: The services you are attempting to create do not have enough quota in the region or subscription.

Live Usage Demo

THANK YOU!
