

Accelerate Developer Productivity with AI

Jason Payne | Federal CTO | Software Nerd

Software is hard – especially for public sector

Budget uncertainty

Technical Debt

Knowledge gaps

App and data silos

Complex integrations

Software development is changing

Three trends stand out: AI, platform engineering, and security

Generative AI will significantly alter 70% of the design and development effort for new apps

94% of organizations say platform engineering helps to better realize DevOps benefits

\$1.7 million saved by organizations with high DevSecOps adoption

AI is transforming the developer experience

A McKinsey study found that equipping developers to be their most productive also significantly improves the developer experience, and developers using generative AI-based tools were more than twice as likely to report overall happiness, fulfillment, and a state of flow.

AI helps across the entire software development lifecycle

What is a copilot? What is an agent?

Copilot

Human augmentation

Works as your personal assistant

There are only as many Copilots as there are people

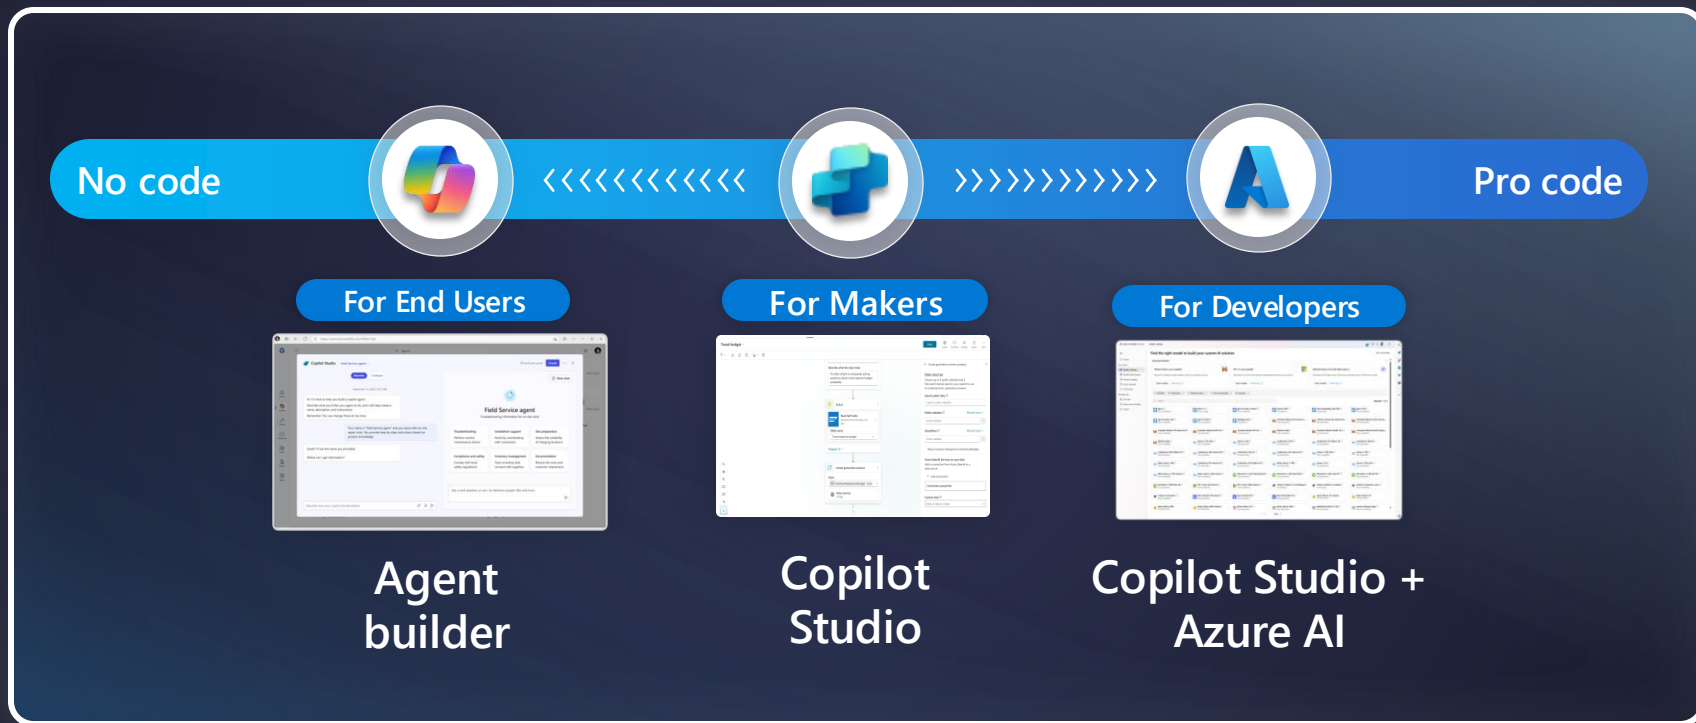

Agents

Expert systems that can work autonomously

Works on behalf of a process or agency

There are more agents than people

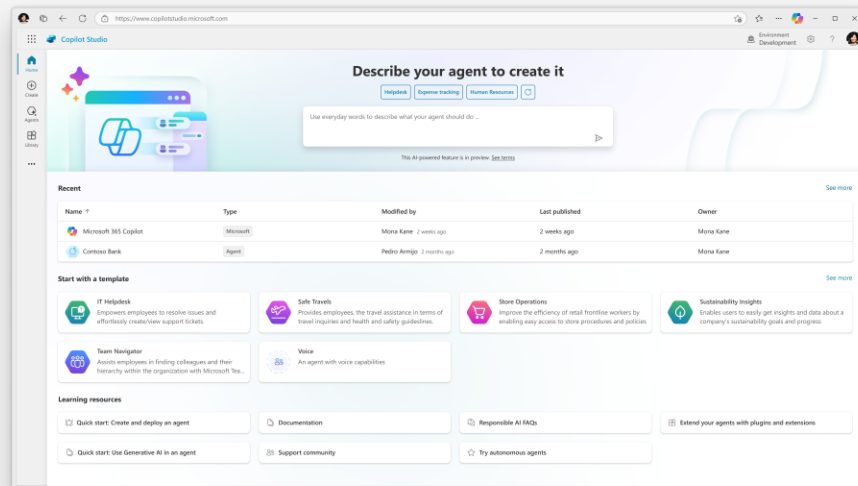

AI tooling spectrum

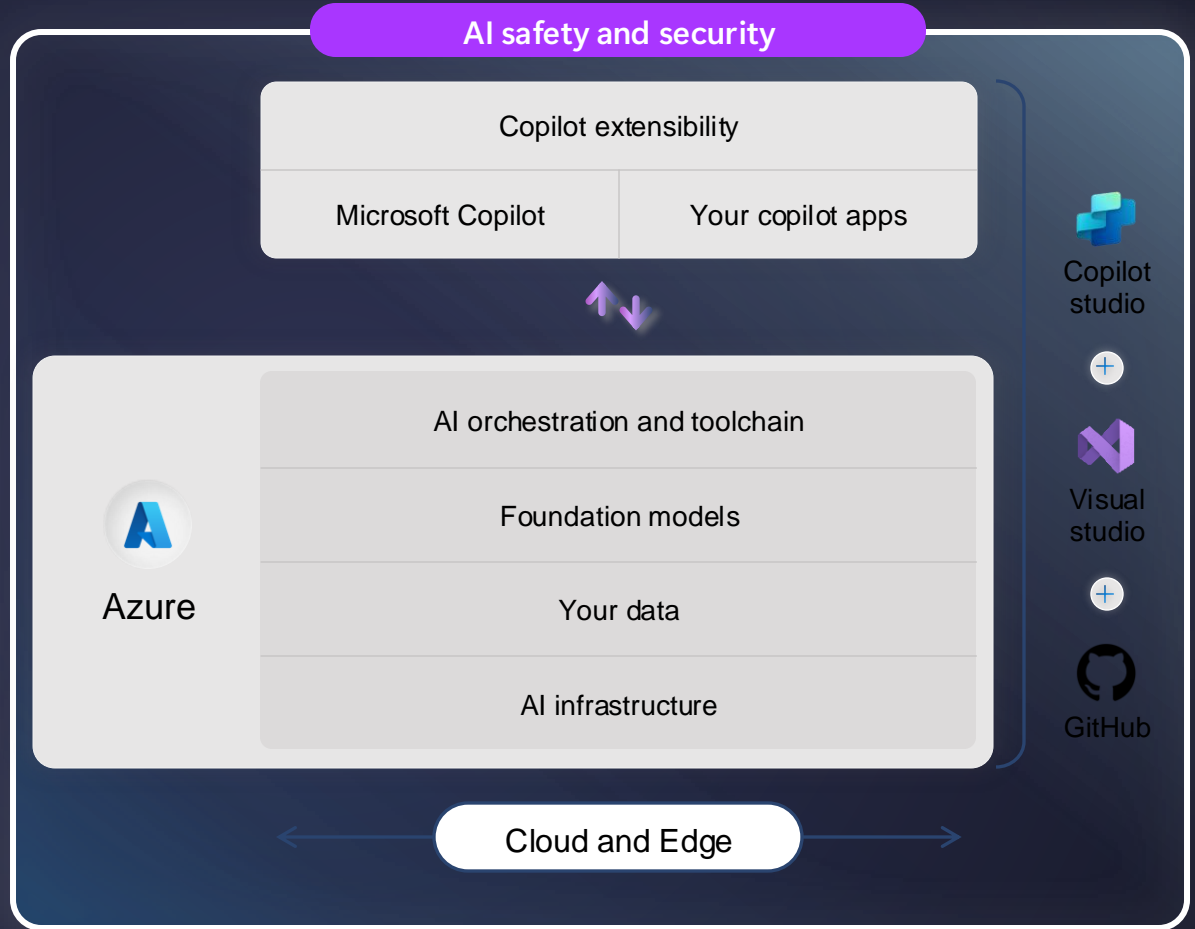

Copilot Studio

Copilot Studio is the solution to build agents that **extend Microsoft 365 Copilot** or **operate standalone**.

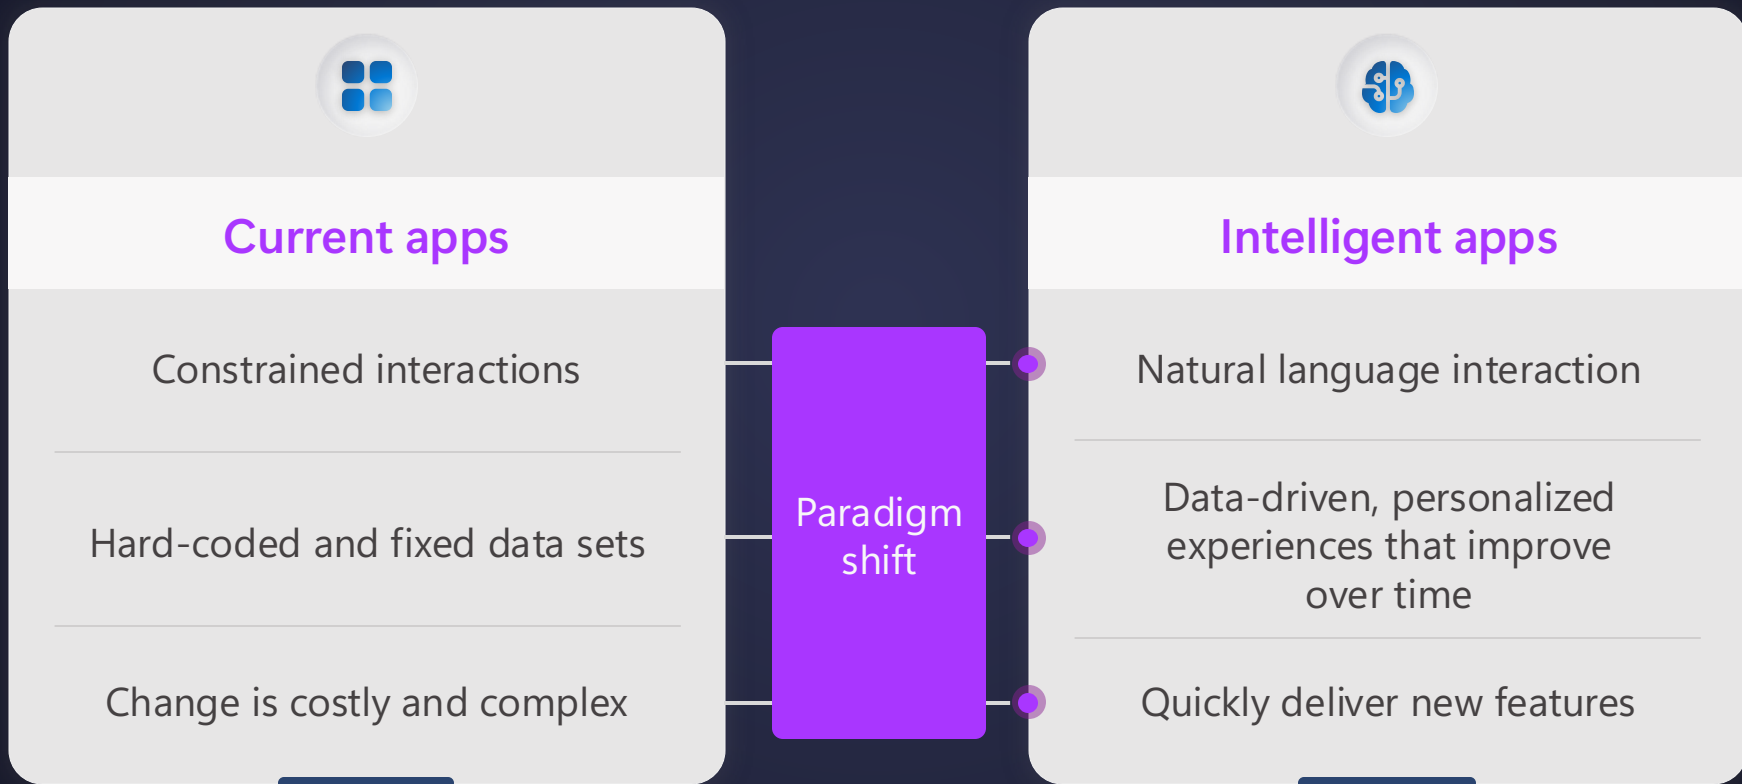

- ✓ Meet your users where they already are
- ✓ Access everything in one place
- ✓ Automate your workflows
- ✓ Integrate with your external apps
- ✓ Connect to your data in Microsoft 365

Copilot Stack

Generative AI makes apps truly intelligent

Powered by AI

Copilot
enables
faster coding
by 55%

75% of
developers are
more fulfilled

70,000+
businesses
have used it

46% of code
is written with the
help of Copilot

More than
1.5M developers

The Copilot effect.

The world's most widely adopted AI developer tool.

Maximize developer happiness

Increase developer productivity

Accelerate software development

A 6-month study of 450 Accenture developers on the impact of GitHub Copilot

Activity

94%

Reported staying
in the flow

90%

Spent less time looking
for information

Productivity

90%

Reported writing better code

88%

Of the code suggested
by Copilot retained

Efficiency

50%

More builds

84%

Increased in
successful builds

Satisfaction

96%

Successful on day one

90%

More fulfilled

Why AI? Improving developer experience drives mission outcomes
